**CIRCUIT REQUIREMENTS**  
**SIGNAL CIRCUIT**

Message Register - Special "A" Switchboard - Full Mechanical Power Driven System.

GENERAL DESCRIPTION

1. This circuit is used at the special "A" switchboard with cord and district circuits, to record the number of incoming calls from a full mechanical office which have been completed by the operator.

DETAILED DESCRIPTION

2. The coin collect and message register key is operated, closing a circuit which operates the message register and lights the pilot lamp. The key is released, releasing the message register, extinguishing the lamp and restoring the circuit to normal.
